

Dolphin Starter to Championship Start System

The Dolphin Starter to Championship Start System kit (K-DSS-2) contains:

- Adapter cable with locking mini BNC connection on one end and locking BNC connected to a dual banana plug on the other
- Black holster which mounts on a microphone clip on the Champ Start

Use one of the microphone clips to hold the microphone, and mount the Dolphin holster on the other, as shown.

Attach the cable and adapter between the Dolphin Starter and the Timer Start jack on the ChampStart. **NOTE:** you must **unlock** the locking mini BNC connector when disconnecting from the Dolphin Starter or you will damage your cable.
